Spring Plungers • smooth, with collar and ball, self-clamping 22080.0808

Product Description

Spring plungers can be used for locating or for applying pressure, as a detent or for ejection. Due to expanding fit of the body, the spring plungers can accommodate variation of up to 0,2 mm in the locating bore. A less precise locating hole means lower machining costs.

Material

Body

· Thermoplastic POM, black

· Thermoplastic POM, white

Spring

· Stainless steel

Assembly

Thanks to the flexible design of the body, a direct manual mounting and a secure overhead installation is possible.

More information

Notes

Special types on request. Spring plungers are specially tested for spring range and forces.
