Index Plungers Compact • with hexagon collar and locking, with T-Handle 22110.0842

Product Description

Index plungers are used for indexing bores. Simple handling, e.g. when using safety gloves, with higher pull release. Types with / without lock have the same building height. Due to a thread recess the index plungers can be completely screwed in.

Material

BodySteel, blackened

Locking pin

Steel, hardened

Knob

Thermoplastic PA 6, black, dull

Assembly

The screw length can be adapted by distance collars for index plungers (EH 22120.).

Operation

The T-Handle is pulled out, turned 90° and secured by an internal notched catch (when locking pin should not overhang). The positions are defined distinctively by the T-Handle.

More information

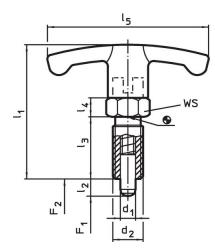

Notes

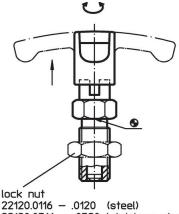

Knob not removable. Lock nuts have to be purchased separately.
