

Clamping Claws

23370.0140

Product Description

Clamping claws are used as precision clamping element in conventional fixtures. A locating hole is provided in the body of the fixture. The hole depth has to be adapted to the desired clamping height.

For the version with ground support surface (picture 1), a support can be attached to the rounded claw part (radius R2) to absorb the counter force. This support can be flat, half-rounded or V-shaped.

For the version with positioning bushing (picture 2), a support to absorb the counterforce is not necessary. The positioning bushing, which must be inserted into the fixture, serves as a support for the clamping claw. This bushing is included in the scope of delivery and can also be ordered separately as an accessory.

Clamping is achieved by means of an enclosed hexagon screw DIN 933 (ISO 4017).

Material

Bushing

- Case-hardened steel, case-hardened

Body

- Case-hardened steel, case-hardened, blackened and ground

Disc

- Heat-treated steel, tempered, punched, mechanically trued, phosphatized

Spring

- Spring steel wire

Clamping screw

- Heat-treated steel

More information

Notes

The tightening torque depends on the specific mounting situation.

References

The clamping height can be reduced by using clamping inserts, e.g. EH 22730.

Application example

Compliance

RoHS compliant

Contains lead - compliant according to exceptions 6a / 6b / 6c.

Contains SVHC substances >0,1% w/w

Contains lead - SVHC list [REACH] as of 23.01.2024.

Contains Proposition 65 substances

Lead can cause cancer and reproductive harm from exposure
