## **Product Description**

Ball lock pins made from titanium stand out due to the following positive material features:

- Over 40% lighter weight compared to a steel variant
- · Absolutely corrosion resistant.

The version made from titanium is used in areas such as lightweight construction, maritime environments and chemical manufacturing.

For quick fastening, locking, adjusting, changing and securing. Quickly and easily unlockable for frequently repeated connections.

Compact design with standard handle.

## Material

## Pin part

Titanium

#### Ball

Ceramic

## Spring

nc.

· Corrosion resistant alloy

## **Operation**

The balls are unlocked by pressing the button.

#### More information

#### **Notes**

Special types on request.

#### Accessories

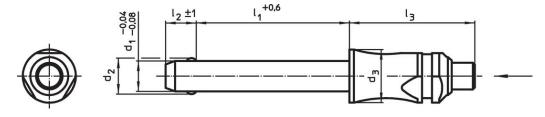

Can easily be fitted with retaining cable EH 22400.
